

CAPEWEB RESOURCES

The Automation Playbook

Stop trading time for money. Here are the high-impact tasks you should automate today.

01 The "Low Hanging Fruit"

Start with tasks that are repetitive, rule-based, and happen frequently. These give you the quickest ROI.

Lead Capture & Follow-up

Don't let leads go cold. Automate an instant "Thanks, we received your message" email with a booking link.

Appointment Reminders

Reduce no-shows by 80% with automated SMS and Email reminders 24h and 1h before calls.

02 Strategic Automation

Once the basics are covered, move to workflows that enhance the customer experience.

Onboarding Sequences

Drip-feed educational content to new clients over 2 weeks. Build trust without lifting a finger.

Review Requests

Trigger a "How did we do?" email 3 days after a project is marked "Complete" in your CRM.

Pro Tip: Don't automate a bad process. Optimize the workflow manually first, then automate it.
